

Extended Warranty Service

When the Warranty Period Is Just Not Good Enough

Extend Your Warranty Period

MHL Computer Products can extend your Warranty Period for both New and Refurbished Printers.

MHL provides a 30-day Warranty on all refurbished printers. For a minimal fee, we can extend that warranty up to one year.

Manufacturer warranties for new printers often last only one or two years. Most banks intend to keep their printers 3 years or longer. MHL Computer Products **Extended Warranty Service** can extend your coverage for an additional year. This provides you a no-risk fixed price solution to your maintenance needs for the life of your printers.

Faster Turnaround Time

Our Extended Warranty Service provides guaranteed turnaround times so you know you will get your printer repaired and returned promptly. There's no need to buy spare printers just because your warranty does not meet your business requirements. We will customize a plan to fit your specific needs.

Cost-Effective

MHL Computer Products provides service for thousands of printers nationwide. We have a large inventory of parts and spare printers so we can provide this service at very attractive pricing. Since we are adding value to your current warranty rather than providing a full-priced service plan agreement, your additional cost is minimized.

Free Services Estimate

If you're interested in extending your printer warranty, please call us at **800-343-1764** or email at info@bankprinters.com for a non-obligation quotation.
